

Website Checklist for Businesses

Before you launch, get these right.

STRATEGY

- ☐ One clear primary action per page (what should a visitor do?)
- ☐ Homepage answers: who you are, what you offer, who it's for - within 5 seconds
- ☐ Every page has a purpose; cut pages that don't earn their place

CONTENT

- ☐ Headlines say what you do, not clever wordplay
- ☐ Real photos or work samples, not generic stock
- ☐ Contact details visible without scrolling to the footer

TRUST

- ☐ Show real client work or testimonials
- ☐ Transparent pricing or a clear path to a quote
- ☐ Working contact form and a monitored inbox

TECHNICAL

- ☐ Loads in under 3 seconds on mobile
- ☐ Readable on a phone without zooming
- ☐ HTTPS enabled; no broken links
- ☐ Page titles and meta descriptions set for every page

BEFORE SHIPPING

- ☐ Proofread every page (typos cost trust)
- ☐ Test all forms and links
- ☐ Check on a real phone, not just a desktop browser
- ☐ Set up basic analytics
